

SANGRAM SANTOSH SALGAR

+91-77568-44169 · sangramsalgar204@gmail.com · [linkedin.com/in/sangramsalgar](https://www.linkedin.com/in/sangramsalgar) · Pune, Maharashtra, India

SUMMARY

Computer Engineer (SPPU, 2026) and Founder & CEO with 4 years building AI, full-stack, and IoT-driven products. Shipped 10+ real-world applications in AgriTech, food security, smart traffic, and NLP content safety. Selected by BIRAC, IBM Cloud, and Google Cloud for Startups. Research published by the Government of India (IndiaAI). Passionate about large-scale systems, impactful software engineering, and building products used by real people.

EDUCATION

B.E. Computer Engineering | SGPA : 9.6 / 10.0 (CGPA- 8.46/10.0)

Nov 2022 – Apr 2026

Smt. Kashibai Navale College of Engineering, Pune · Savitribai Phule Pune University

Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Machine Learning, Software Engineering, Cloud Computing

HSC (PCMB): 74.67% · Fergusson Junior College, Pune

2021

SSC: 89.80% · Jai Jawan Jai Kisan Boys Military School, Solapur

2019

EXPERIENCE

Founder & CEO · MahaSangram Private Limited

Sept 2019 – Present

Pune, Maharashtra

- Architected and shipped AgriSmart, an AI-powered crop advisory platform with soil health monitoring, IoT sensor integration, and multilingual NLP advisory — selected for BIRAC's National Bio-Entrepreneurship Programme and onboarded to IBM Cloud Startup Programme and Google Cloud for Startups.
- Built FoodBank, a hyperlocal food redistribution platform using geolocation, AI logistics, and predictive demand analytics to connect surplus food donors with communities in need.
- Designed and developed ASGT (Automatic Signal Generation Technology), an AI + IoT real-time adaptive traffic management system with emergency vehicle priority routing, reducing average signal wait times and supporting India's Smart Cities Mission.
- Engineered a multilingual AI Content Moderation Tool using NLP, Computer Vision, and ML classifiers for real-time harmful content detection across social media platforms — research published by IndiaAI, the official AI initiative of the Government of India (2024).
- Launched SmartVillages, a rural e-commerce platform connecting 100+ farmer and artisan producers to wider digital markets, and BREATHE, a community-level carbon footprint tracking system with upcoming carbon credit exchange.
- Led end-to-end product lifecycle across 10+ initiatives: ideation, system design, full-stack development (Python, TensorFlow, GCP, Firebase), deployment, and stakeholder partnerships discussion with ISRO, IMD, OpenAI, and government bodies.

Research Intern · National Human Rights Commission (NHRC) of India

Aug 2024

New Delhi

- Researched the application of AI and ML in human rights monitoring; analysed 50+ case studies and contributed to internal policy documentation reviewed by senior commissioners.
- Produced a structured report on ethical AI deployment in human rights contexts, submitted to the NHRC research division.

Cybercrime Trainee · Ministry of Home Affairs — National Cybercrime Training Centre

Feb – Mar 2025

Government of India

- Selected competitively for GOI's national cybercrime training programme. (Not Attended)

Technical Intern (Computer Operator) · Pune Municipal Corporation (PMC)

Jun – Jul 2024

Pune, Maharashtra

- Managed civic data pipelines and built visualisation dashboards for urban planning and administrative decision-making, improving data retrieval efficiency for the department.

UN Volunteer · United Nations Volunteers (UNV) / UNDP

Jun 2024

Remote

- Contributed to UNDP-led SDG community development initiatives; supported data collection and reporting aligned with UN Sustainable Development Goals (Zero Hunger, Clean Energy, Sustainable Cities).

PROJECTS

Sanskrit Programming Language (SPL) with Quantum Computing

Python · Quantum SDK · AI/ML

- Designing a cross-platform, POP+OOP, AI/ML-integrated programming framework leveraging Sanskrit's formal grammar for quantum-optimised algorithms, entanglement handling, and quantum cryptography applications.

AI Content Moderation Tool

Python · TensorFlow · NLP · Computer Vision

- Built multilingual content safety classifier (NLP + CV) detecting hate speech, misinformation, and harmful content in real time across social media and enterprise APIs; deployed with customisable sensitivity thresholds and transparency reporting. Published by IndiaAI, Govt. of India.

AgriSmart — AI Crop Advisory System

Python · TensorFlow · IoT · GEE · Firebase

- End-to-end ML pipeline for crop disease detection (92%+ accuracy in testing), soil health analysis, and AI-powered advisory with multilingual voice and text interface; integrated Google Earth Engine satellite data for real-time remote sensing.

ASGT — Adaptive Smart Traffic System

Python · IoT · Computer Vision · GCP

- Real-time computer vision and IoT system for vehicle density detection and adaptive signal control; emergency vehicle priority routing reduces ambulance response time; analytics dashboard deployed for municipal traffic authorities.

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, Kotlin, JavaScript

AI / ML: TensorFlow, Scikit-Learn, PyTorch (basics), NLP, Computer Vision, Transformers

Cloud: Google Cloud Platform (GCP), IBM Cloud, AWS (EC2, S3, Lambda), Firebase

Databases: MySQL, PostgreSQL, Firestore, MongoDB (basics)

Dev Tools: Git, GitHub, VS Code, Jupyter Notebook, Android Studio, Docker (basics)

Geospatial: Google Earth Engine (GEE), NASA Remote Sensing APIs, IIRS-ISRO Platforms

IoT & Systems: Arduino, Raspberry Pi, IoT sensor integration, Edge computing

Concepts: Data Structures & Algorithms, System Design, REST APIs, Agile, CI/CD basics

ACHIEVEMENTS & RECOGNITION

- The Young Achiever of the Year 2024 — national-level recognition for technology and social entrepreneurship.
- Published researcher — IndiaAI (Government of India's official AI initiative), 2024.
- Recognised at World Food India 2024 — Ministry of Food Processing Industries, Govt. of India.
- ISRO-Verified Contributor (IIRS-ISRO) — completed courses.
- Global Youth Leadership Award — 2021, 2023, 2024 (Global Youth Parliament, Nepal).
- Selected: BIRAC National Bio-Entrepreneurship Competition 2024 & 2025 | IBM Cloud Startup Programme | Google Cloud for Startups | Microsoft for Startups Founders Hub.
- 15+ national & international competitions including ISRO Bharatiya Antariksha Hackathon, NASA Space Apps Challenge 2024, Supreme Court of India Hackathon 2024, IIT Madras Hackathon.

CERTIFICATIONS

- Geodata Processing using Python | Remote Sensing of Soils | Exploring Earth's Moon through Chandrayaan | Integration of EO Data for Geological Applications — IIRS-ISRO
- AI for India 2.0 — Guvi / IIT Madras & Google · Y Combinator Startup School — Founder Track (2025)
- Google Developer Program · Google Cloud Innovator · Google Maps Platform Innovator · Google Earth Engine Developer
- 20+ certifications across AI, Cloud, Cybercrime, Geospatial Technology, and Startup Ecosystems
